SUMMARY

Product Designer with 3+ years of experience designing for complex, technical products. Experienced as a sole designer owning a product end-to-end, from research to shipped features. Co-founder of an open-source software company. WCAG accessibility certified.

WORK

Co-founder & Product Designer

PixiLabs · June 2025 - present

- Co-founded a company to scale PixiEditor, an open-source 2D graphics editor, into a sustainable business. Now used by 200k+ users.
- Defined product vision and roadmap alongside the technical founder, balancing community priorities with business goals.
- Grew paid extension sales ~7.8x in 25 days by identifying and solving a key discoverability problem in the marketplace.
- Led design of the product website for a major version launch.
- Designed the brush picker in the core app, extending the existing design system.
- Shaped business strategy, marketing, and sales.
- Conducted user research with the open-source community.
- Started as a volunteer contributor in 2023.

Freelance Designer

NATAN PLAST · March 2026 - May 2026

- Produced installation instructions, technical product cards, and ad graphics for a manufacturer of eco-grids, working in Figma and Affinity.

Product Designer

ASD Systems · September 2023 - May 2026

- Sole Product Designer responsible for UX strategy, user research, interaction design, prototyping and design system across embedded software, SaaS platform and mobile applications used on 4k+ vending machines in 30 countries.
- Redesigned an account linking flow, reducing onboarding time for new companies from hours to minutes.
- Built and maintained the design system for the company's next-generation embedded products.
- Designed new features that unlocked new machine sales.
- Designed marketing assets supporting adoption of newly released features.
- Ran usability testing with enterprise clients and internal stakeholders, iterating designs based on findings.
- Presented product progress and design decisions to stakeholders.
- Partnered with Managers, Engineers and stakeholders to define roadmap and launch new features.

SKILLS

Design systems
Prototyping
Accessibility
Information Architecture

EF SET

Freelance IT Specialist & Product Lead

NATA Automation · August 2023 - January 2024

- Resolved network issues while connecting a Siemens PLC device on a production line.
- Migrated company email and website to a new hosting provider.
- Led development of a React web app for tracking PLC data. Built the first version personally, then transitioned into leading design, requirements gathering, and client communication as the team grew to include dedicated developers.

Lead Designer

TheIoTProject · July 2023 - August 2023

- Joined a 5-person team as Web Developer and quickly became Lead Designer for KeyBox, a physical key-management IoT device prototype.
- Designed the project website, and led promotional efforts including press outreach.
- Delivered a working device prototype and website in 2 months.
- Project featured in local press and on the Electromaker blog.

AWARDS

1st Place - Ratusz24 Web App

RekordSI · January 2025

- Built the winning concept for a municipal services platform used by municipalities representing 1.6M residents.

2nd Place - TrailMate Mobile App

HackBB · September 2023

- Created a navigation and ride-planning app for Enduro riders, enabling route sharing and trail discovery in under 24 hours.

3rd Place - Humi Desktop App / Widget

HackBB · September 2025

- Led the design of an AI-powered meeting assistant, creating the product experience and animated visual assets in Figma and Lottie during a 24-hour hackathon.

3rd Place - Apteczka na Szlaku Mobile App

HackBB · September 2024

- Designed a hiking safety app providing emergency guidance and first-aid information for outdoor enthusiasts in under 24 hours.
